

Serbian Academy of Sciences and Arts and the University of Belgrade, Faculty of Technology and Metallurgy, are inviting you to the 2nd International Conference "Electron Microscopy of Nanostructures" ELMINA2020, which will be held in Belgrade, Serbia, September 14th - 18th, 2020. Presentations at ELMINA2020 Conference will be plenary (by invitation only), while other participants are encouraged to send abstracts for either oral or poster presentations. The scope of ELMINA2020 will be focused on electron microscopy methods applied to nanoscience and nanotechnology (physics, chemistry, materials science, earth and life sciences). It will highlight recent progress in imaging and data analysis, large data set handling, as well as time and environment dependent processes.

The scientific program contains the following topics:

- * Instrumentation and New Methods
- * Diffraction and Crystallography
- * HRTEM and Electron Holography
- * Analytical Microscopy (EDS, EELS, and APT)
- * Nanoscience and Nanotechnology
- * Life sciences

Confirmed Invited Plenary Speakers: Jordi Arbiol, Sara Bals, Gerhard Dehm, Peter Denes, Rafal Dunin-Borkowski, Joanne Etheridge, Rolf Erni, Paulo Ferreira, Hamish Fraser, Daniel Gianola, Colin Humphries, Yuichi Ikuhara, Wolfgang Jäger, Wayne D. Kaplan, Thomas Kelly, Christoph Koch, Ondrej Krivanek, Laurence Marks, Andrew Minor, Peter Nellist, Eva Olsson, Colin Ophus, Quentin Ramasse, Robert Sinclair, Sašo Šturm, Kazu Suenaga, Maria Varela del Arco.
